1 POLICY STATEMENT

Playtech believes that safer gambling is a critical part of the long-term success of its B2B and B2C gambling operations as well as the sustainability of the industry as whole. Playtech believes that the gambling industry can provide a safe and responsible form of entertainment. While the majority of people who gamble do so in a responsible and safe manner, we recognise that there are risks involved whereby gambling can cause harm.

As a leading, global technology supplier to the sector, we recognise that we have an important role to play in developing technology solutions to address safer gambling challenges and raise standards across the industry. We believe that innovation in safer gambling is critical for keeping pace with regulatory, consumer and societal expectations to deliver a positive, safer online customer experience that people can trust. Innovation is critical, as we need to keep pace with expectations, reduce risk, maintain trust with our stakeholders and continue to be a viable business in the long term.

This is why Playtech has made safer gambling a core part of its long-term sustainability strategy. We have set out our ambition to be a trusted, global leader in safer products, data analytics and player engagement solutions to raise industry standards. Our commitments include:

- Increasing uptake of safer gambling technology, tools and solutions;
- Harnessing investment in R&D to advance the next generation of safer solutions and features, including responsible game design; and
- Strengthening safer gambling standards and technology across our operations.

In addition, this is underpinned by our commitment to adhering to safer gambling regulatory and licensing requirements in the countries in which we operate. Playtech is a proud signatory to the Betting and Gaming Council ('BGC') industry Safer Gambling Commitments, which aim to deliver long-term and fundamental change to how gambling companies empower, protect and support customers. The commitments cover 22 actions across five core areas, including:

- Preventing underage gambling and protecting young people.
- Increasing support for treatment of gambling harm.
- Strengthening and expanding codes of practices for advertising and marketing.
- Protecting and empowering customers (through product design and customer engagement).
- Promoting a culture of safer gambling.
- The Policy sets out standards for responsible marketing, advertising and sponsorship - online and offline as well as other marketing communication activities. This Policy aims to support our commitment to Strengthening and expanding codes of practices for advertising and marketing as compliance with our responsible business practices as well as regulatory requirements.

3 GUIDING PRINCIPLES

As part of our commitment to responsible advertising and marketing guidelines, we are committed to ensuring that all advertising and marketing communications will:

- Be legal and comply with all legislative and regulatory requirements including ASA CAP and BCAP Codes, IGRG, LCCP and relevant Industry voluntary codes.
- Consider customer risk profiles when deciding on the type and frequency of marketing communications in B2C operations;
- Be truthful and not mislead consumers through omission or misleading statements such as 'free bet';
- Advertise and market products fairly and clearly;
- Ensure that promotions and terms and conditions are transparent, visible and clear to players and no more than one click away from the advertisement;
- Ensure care is taken into not exploiting children and other vulnerable people in relation to gambling activity – including exploiting the susceptibilities, aspirations, credulity, inexperience or lack of knowledge of children, young persons or other vulnerable persons;
- Prevent underage appeal (appeal to under 18s) especially using advertising methods and content that could reflect being associated with youth culture;
- Promote responsibility messages and links; including a message with 18+ and/or relevant legal age restrictions as well as links to signposting to organisations with information about safer gambling such as www.gambleaware.co.uk;
- Avoid portraying, condoning or encouraging gambling behaviour that is socially irresponsible that could lead to financial, social or emotional harm – such as promotion of solitary gambling, promotion of gambling as a solution to financial issues, an alternative to employment or an option to achieve financial security;
- Be mindful not to portray gambling in a context of toughness or link to resilience or recklessness;
- Be mindful of sensitives relating to local cultural values, gender, race, sexual orientation and religion;
- Not employ themes that link gambling to seduction, sexual success or enhanced attractiveness;
- Avoid the use of aggressive advertising methods;
- Not mislead consumers by exaggerating the capability or performance of a product; and
- Must hold documentary evidence to prove claims that consumers are likely to regard as objective and that are capable of objective substantiation.

4 SAFER GAMBLING MESSAGING

- Responsibility messages or icon must be included in all communications and be visible and clear to players.
- Include information on help lines on gambling related problems, where the Player or relatives can seek help.

- Include the 18+ or any legal age limit applicable symbol.

- Include Terms & Conditions (T&Cs) apply, where applicable.
- Include Wagering requirements, if applicable.

- May not involve paid actors, athletes, or models under the age of 25. Must not include anyone appears to be, under 25.

- In line with new industry guidance, those involved with marketing will take all practical steps to protect young people from accessing advertisements and promotions.
- B2C and Product marketing leads will implement +25 age-targeting in social media and "Pay Per Click" advertising where platform facilities permit, to increase confidence in the social media platform's own age-gating, which is currently based on self-certified data and relies on the honesty of the user;
- Relevant leads will use the industry (BGC) approved common list of industry negative search terms (extended to affiliates) to be shared with search engines, along with a list of sites for suppression for the purposes of de-targeting in display so that advertising does not appear on sites with content that could have particular appeal to under 18s or vulnerable people, all frequently reviewed, updated and shared on an on-going basis;
